33784		Davco Fuel Systems	CFM	4.320	3.480	T-CLOSED B-.660	Packed (2)			
33785		Various John Deere Tractors	CFM	8.760	T-5.401 B-4.550	T-CLOSED B-1.000	None			
33786		Various Caterpillar Equipment	SOFW	9.983	4.250	1-14	Attached	3.92	3.4	.38
33787		Various Caterpillar Equipment	SOFW	10.080	4.250	1-14	Attached	4.265	3.7	.2
33788		Racor 390, 490, 690 Series Fuel/Water Separators (2 micron)	SOFW	6.100	4.360	1-14	Packed Packed	3.575 4.3	3.175 4.01	.33 .18
33791		Racor FH900, FH1000 Turbine Fuel Series for Over-the-Road Trucks (02 and up) - 30 Micron	CFM	9.630	4.680	T-CLOSED B-.75	Packed (4)			
33792		Racor 900FH, 1000FH Turbine Fuel Series for Over-the-Road Model Trucks (2002 and up) - 10 Micron Version	CFM	9.630	4.680	T-CLOSED B-.75	Packed (4)			
33793		Racor 900FH, 1000FH Turbine Fuel Series for Over-the-Road Model Trucks (2002 and up) - 2 Micron Version	CFM	9.630	4.680	T-CLOSED B-.75	Packed (4)			
33794		Racor FH Turbine Series Model 500FG - 30 Micron	CFMF	2.780	3.080	T-.650 B-.670	Packed (2)			
33795		Racor FH Turbine Series Model 500FG - 10 Micron	CFMF	2.780	3.080		Packed (2)			
33796		Racor FH Turbine Series Model 500FG - 2 Micron	CFMF	2.780	3.080	.660	Packed (2)			
33797		Racor FH Turbine Series Model 900FG - 30 Micron	CFMF	4.600	T-4.680 B-4.345	T-.645 B-.750	Packed (4)			
33798		Racor FH Turbine Series Model 900FG - 10 Micron	CFMF	4.600	T-4.680 B-4.345	T-.655 B-.750	Packed (4)			
33799		Racor FH Turbine Series Model 900FG - 2 Micron	CFMF	4.600	T-4.680 B-4.345	T-.645 B-.750	Packed (4)			
33811		Ford Trucks/Vans w/6.9 Liter Diesel Engine (83-88), IHC Trucks (6 Micron)	SOF	4.332	4.282	⅞-14	Attached	2.834	2.462	.200
33812		IHC Trucks w/ Cat + Cummins Engines - (30 Micron - 33813 is 10 micron version)	SOFW	6.250	4.380	1-14	Attached	4.08	3.66	.275
33813		Various HD Truck Applications - 10 Micron - (33812 is 30 micron version)	SOFW	6.250	4.380	1-14	Packed Packed	4.11 4.12	3.7 3.88	.275 .12
33899		Ford Super Duty Pickup, Excursion w/ 6.0L Diesel (05-06) - contains 2 different size elements	CFMF	4.400	3.335	T-CLOSED B-1.570	Packed Packed	2.83 3.92	2.65 3.63	.09 .145
33900R		Racing Applications - Replaces Fram HPGC-1	CFM	2.500	2.750	.656	None			
33910		Chevy-GMC Trucks w/ 6.6L Duramax Diesel (01-06) - This number supercedes 33810	SOFW	6.390	4.020	3 ½-16	Packed Packed	1.63 3.755	1.3 3.475	.165 .14
33911		Stanadyne FM100 Series (5 Micron)	KWFM	5.770	3.460	T-.680 B-CLOSED	None			
33912		Stanadyne FM100 Series (30 Micron)	KWFM	5.770	3.460	T-.680 B-CLOSED	None			
33913		Stanadyne FM100 Series (150 Micron)	KWFM	5.770	3.460	T-.680 B-CLOSED	None			
33914		Stanadyne FM100 Series For Marine Applications (5 Micron)	KWFM	5.850	3.460	T-.680 B-CLOSED	None			
33915		Stanadyne FM100 Series For Marine Applications (30 Micron)	KWFM	5.850	3.460	T-.680 B-CLOSED	None			
33916		Stanadyne FM100 Series For Marine Applications (150 Micron)	KWFM	5.850	3.460	T-.680 B-CLOSED	None			
33920		Detroit Diesel Series 60, 55, 50 Engines (2005-on only) (This is a 33120 w/ a different style base plate)	SOF							
33940		Cummins Tier 2 QSB Applications	SOFW	9.806	3.657	1 ⅛-16	Attached	2.834	2.462	.205
33943	G-156	Dodge Trucks (57-65), Ford Trucks (63-64),IHC Trucks, Rambler (62-63)	CFM	1.890	1.371	T-CLOSED B-.555	15308 15253	2.093 1.937	1 1	.062 .08
33957	G-77B	Ford Taurus, Mercury Sable w/ 3.0L (01)	F	6.377	T-2.244 B-2.000		None			
33958		Primary Detroit Diesel 12V-71,16V-71,16V-92 Engines (16 Micron) - Used with secondary 33959	SOF	8.957	4.658	1 ¼-12	Attached	4.320	3.820	.365
33959		Secondary, used with 33958 Primary(10 Micron)	SOF	8.957	4.658	1 1/16-16	Attached	4.320	3.820	.365

WIX Racing Oil Filters

WIX provides two very different and distinct racing filters — **Advanced Performance Filters (T-10)** and **High Efficiency Endurance Filters (T-71)**

Advanced Performance Oil Filters use a media **(T-10)** that is rated at a Frazier air flow of approximately 267 CFM and is wire-backed. The unique wire-backing provides a very stable base for a media blend of fiberglass, polyester and cellulose. This media is resistant to high temperatures and water levels in the oil that can plug standard media types. Our **Advanced Performance media (T-10)** is designed to provide a high positive oil flow with low restriction (*see chart, page 3*).

WIX Advanced Performance (T-10)
Oil Filter Part Numbers Are:

51268 57003R* 57007R

Remote Mount Adapters Are Required (see pages 7 & 9).

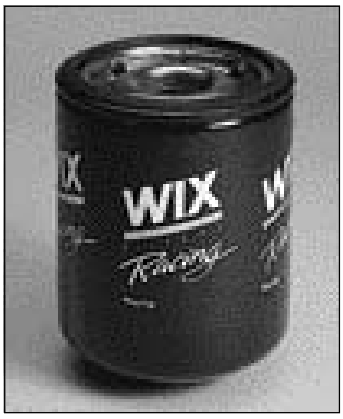
Additional Oil Filter Features Include...

A. Heavy-walled can and cover to withstand the extreme burst pressures (up to 500 psi).

B. High temperature nitrile components (up to 300°F)…Anti-drainback valve (when included) and base plate gaskets to withstand extremely high racing temperatures.

C. Zinc chromate plated base plate…Low surface friction and corrosion-free.

D. Spiral wound center tube provides increased collapse pressure and enhanced flow pattern.



E. Metal end caps provide element strength and prevents filtering bypass.

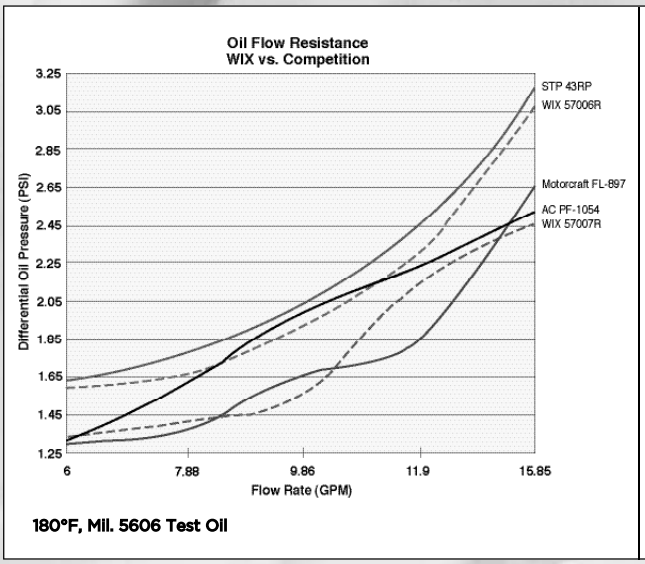
F. Individually sealed to protect against contamination by environmental dust or dirt.

These are the WIX recommended oil filters for maximum horsepower increase, to be used primarily on concrete or asphalt tracks.

For optimum performance, use our Advanced Performance Oil Filters with our Advanced Performance Air Filters.

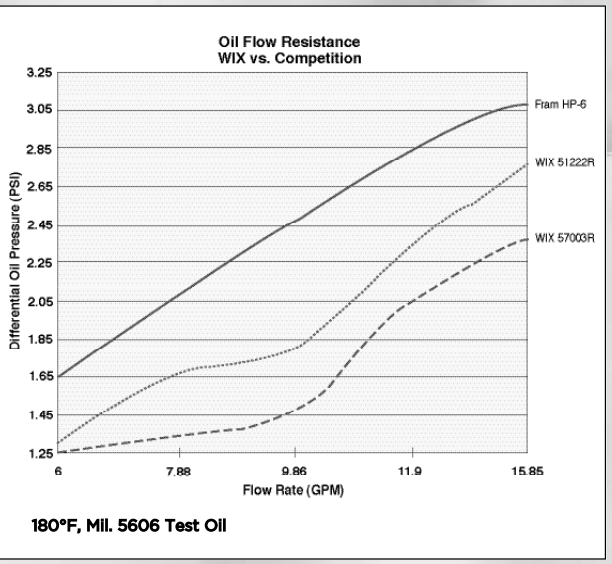
WIX Racing Oil Filters

High Efficiency Endurance Oil Filters use a media **(T-71)** rated at a Frazier air flow of approximately 75 CFM. This media contains a higher resin content than our **Advanced Performance Filters** to trap and hold smaller contaminants and provide higher efficiency.



Our **High Efficiency Endurance Filters** also include the same component features as the **Advanced Performance Filters**: high burst pressure can, high temperature rubber components, zinc chromate base plate, metal end caps and spiral center tubes.

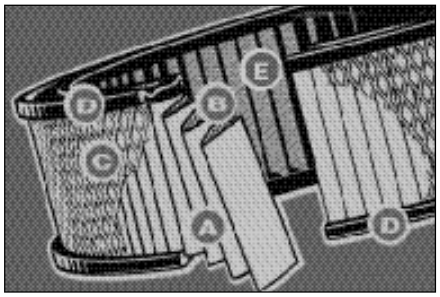
WIX High Efficiency Endurance (T-71) Oil Filter Part Numbers Are:



51060R 51061R 51069R 51222R 51515R 51794R

These are the WIX recommended oil filters for better efficiency needed on dirt, clay or off-road tracks.

For better protection, use our High Efficiency Endurance Oil Filters **with** our High Efficiency Endurance Air Filters.



180°F, Mil. 5606 Test Oil

180°F, Mil. 5606 Test Oil

CAUTION: Not intended for street use.

WIX Racing Air Filters

Advanced Performance Air Filters use a unique, patent-pending design. Our wire-backed gauze **Reemay**® media **(T-66)** allows maximum air flow, while minimizing restriction to boost horsepower. With a Frazier air flow of approximately 410 CFM, these air filters have the lowest restriction of any racing filter available (*see chart, page 5*).

WIX Advanced Performance (T-66)
Air Filter Part Numbers Are:

46940R	**46944R**	**46945R**	**46948R**	**46949R**
46941R	**46928R**	**46974R**	**46927R**	**46926R**

Additional Air Filter Features Include...

A. High performance media is designed to provide increased air flow.

B. Wire mesh gauze media support (when included) contributes to rigid filter construction by assuring consistently stable pleats at high air flow volumes.

C. Outer screen of expanded metal protects the filter media and supports the filter assembly.

D. Molded plastisol top and bottom assures a positive seal between the filter and the air intake housing.

E. Inner screen of epoxy-coated steel wire withstands corrosion and insures stability of the filter element.

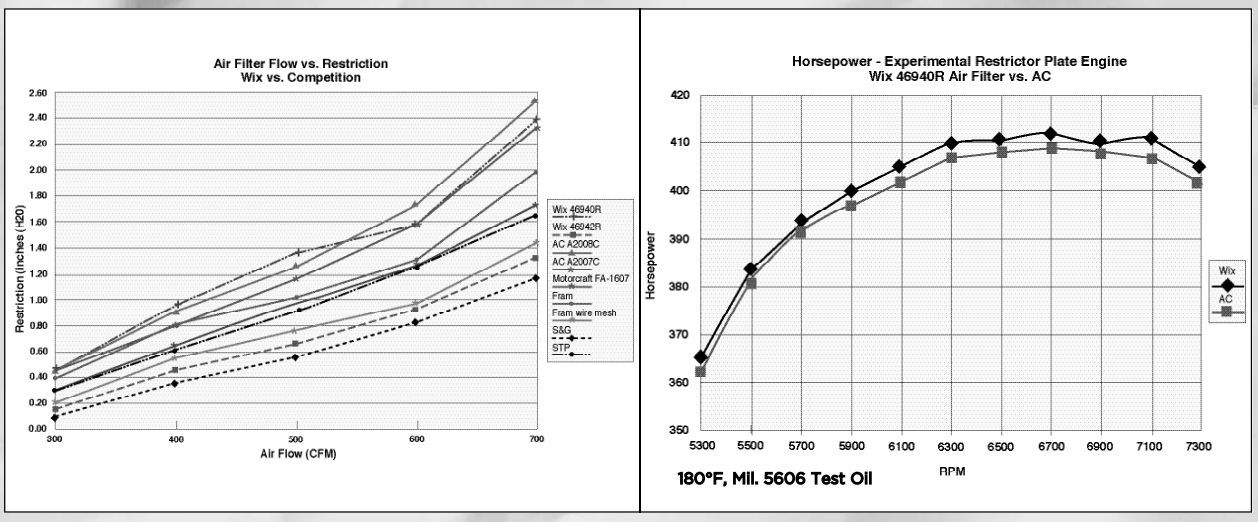
These are the WIX recommended air filters for ***maximum horsepower increase*** used primarily on concrete or asphalt tracks of Nextel Cup, Busch, SuperTruck or ARCA.

For optimum performance, use our
Advanced Performance Air Filters with our
Advanced Performance Oil Filters.

WIX Racing Air Filters

High Efficiency Endurance Air Filters use a media **(T-88)** specifically developed to filter out harmful contaminants while providing low restriction. With a Frazier air flow of approximately 73 CFM, this is an ideal air filter for the Late Model, Sportsman and Modified racers who run primarily on dirt tracks.

Our **High Efficiency Endurance Air Filters** also share the same exclusive component features as the **Advanced Performance Air Filters**



WIX High Efficiency Endurance (T-88)
Air Filter Part Numbers Are:

42095R 42096R 46946R

These are the WIX recommended air filters for better efficiency needed on dirt, clay or off-road tracks.

For better protection, use our High Efficiency Endurance Air Filters **with** our High Efficiency Endurance Oil Filters.

Advance Performance Filter

CAUTION:
Not intended for street use.

Air Filter Monitors

Here's What It Does For You…

The WIX Air Filter Monitor eliminates time-consuming guesswork for knowing when to change light-duty and heavy-duty air filters by providing service personnel with an accurate and easy-to-use mechanical restriction gauge.

The Air Filter Monitor measures the amount of restriction to airflow through the air filter housing assembly. An increase in airflow restriction may cause a reduction in power and an increase in fuel consumption.

Through constant monitoring of your air filters restriction, maintenance personnel can tell at a glance when filter service is required. The monitor "locks up" at the highest restriction measured during engine operation and can be read before or after engine shutdown. The Air Filter Monitor reduces the need for time-consuming filter inspections and needless replacement, just because the filter looks dirty.

Constructed of temperature resistant materials that are precision fitted, the Air Filter Monitor can stand up to a wide range of conditions in both the heavy-duty and light-duty environment. To prevent contamination from airborne vapors or dirt, each monitor is engineered with a sintered bronze filter inside the brass fitting.

The WIX Air Filter Monitor is a practical and accurate tool for determining correct filter maintenance intervals-thus preventing over-servicing of your Air Filters, which lead to excessive costs to you.

Easy To Install

The WIX Air Filter Monitor is available in four easy-to-install models; the Direct Mount (part no. 24800), Direct Mount (part no. 24801) Remote Mount (part no. 24802), or the Chrome Bezel Dash Mount (part no. 24804).

24800

Direct Mount #24800 HD Air Filter Monitor

Constructed of temperature resistant materials to be installed directly to the outlet section of the air filter housing. Installation instructions as well as 1/8" NPT brass fitting are included.

Direct Mount #24801 LD Air Filter Monitor

For use on light-duty, fuel-injected gasoline or diesel engines. Constructed of temperature resistant materials to be installed directly to the outlet section of the air filter housing. Complete installation instructions are included.

Remote Mount #24802 Air Filter Monitor

Various locations can be achieved with ten feet of hose, adhesive mounting bracket, and 1/8" NPT brass fitting. Mounting bracket is engineered for screw mounting. Installation instructions are included.

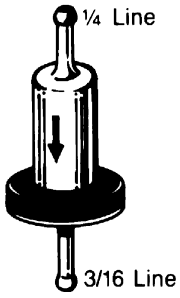
24802

24804

Dash Mount #24804 Air Filter Monitor

Comes complete with 10 feet of hose and a 3/8" brass fitting. Detailed instructions are included.

Part numbers 24800, 24802 and 24804 are suitable for heavy-duty gas and diesel engines and a must when checking turbo-charged diesel engines. Each gauge has a reset button so that the unit indicator can be reset to 0 after each change-out, allowing you to maintain accurate restriction records.



A "must-have" part of your Preventive Maintenance System now available to you from WIX Filters.

Fuel Filters

Setting a New Standard for Compressed Air Moisture Control

Advanced Filter Technology designed to specifically address the issue of system wide and point of use compressed air moisture control. An absolute must to protect air tools and equipment from moisture.

Questions and Answers about AquaChek Air Drying Filtration Products

Q: Why do I need to protect my air tools and equipment from moisture?
A: When moisture comes in contact with metal, corrosion occurs. Rust can form on the internal surfaces of your tools, which causes premature failure. Rust and corrosion are the single largest cause for tool and equipment failure.

Q: How does AquaChek Air Drying Technology work?
A: AquaChek filtration products use special super-absorbing polymer media that traps free water as well as airborne particulate down to one-half (.5) micron. This media will trap and hold up to 28 times its weight in water. Even when it becomes saturated, it will not release the moisture trapped inside. As the water molecules come in contact with the AquaChek polymer media fibers, the two react. The polymer captures the water molecules and encapsulates them, locking them in a semi-solid state.

Q: How does moisture get in my air compressor?
A: When air is compressed, the relative humidity increases. When relative humidity rises above 70%, the water vapor condenses into free water droplets. Standard water traps and dryers reduce free water but water vapor passes through to collect down line and later condenses into free water. AquaChek Air Drying filters absorb free water but also reduce relative humidity in the air to less than 30%, resulting in cleaner, dryer air downstream.

Q: Doesn't my compressor control water?
A: Most compressor packages don't include equipment to control moisture. Many air compressors have holding tanks with drains for water but this does nothing to stop water vapor.

Q: I have a dryer system, why do I need AquaChek filters?
A: Most drying systems fail to deal with water vapor. In order to control free water, water vapor must be controlled.

Q: Is there a system that removes 100% of all free water and water vapor?
A: Although different moisture removal technologies remove varying levels of water, one thing is consistent among all solutions: unless you literally freeze the air to a minus 35 degrees F, some moisture will get through.

Q: Should I use a Primary and Secondary Moisture Removal System?
A: It's recommended. Installing a water trap before the AquaChek Air Drying filter will capture a lot of the free water passing through the line. This will extend the life of the AquaChek filter.

Determining CFM (Cubic Feet per Minute) Requirements for your System

Selecting the correct AquaChek filtration system for your needs depends on the specific CFM capacity of your system. To calculate the CFM rating on your compressor, simply multiply the compressor's horsepower by four. Example: A 10 horsepower compressor will produce about 40 CFM. Use the AquaChek chart on the next page to find the proper kit and filter for your system.

AquaChek Kits

Kit #	Kit Contents	CFM Rating	PSI Rating	Water Capacity
ACK10	Mounting Base w/ ¼" NPT inlet + outlet 1 - AquaChek AC10 spin-on filter 1 – Bottle of lubricating oil Small roll of thread sealing tape Instruction sheet	15	175	10 oz
ACK20	Mounting Base w/ 1" NPT inlet + outlet 1 – AquaChek AC20 spin-on filter Small roll of thread sealing tape Instruction sheet	50	175	20 oz
ACK30	Single Mounting Base w/ 1 ½" NPT inlet + outlet 1 – AquaChek AC30 spin-on filter Small roll of thread sealing tape Instruction sheet	100	250	45 oz
ACK40	Dual Filter Mounting Base w/ 2" NPT inlet + outlet 2 - AquaChek AC30 spin-on filters Small roll of thread sealing tape Instruction sheet	200	250	90 oz

AquaChek Filtration Products

Filter #	Filter Thread Size	CFM	PSI	Water Capacity	Kit #
AC10	11/16-16UN2B	15	175	10 oz	ACK10
AC11	11/16-16UN2B	25	175	20 oz	ACK10
AC20	1-12 UNF 2B	50	175	20 oz	ACK20
AC30	1 ¾ -12 UNF	100	250	45 oz	ACK30
2 – AC30	1 ¾ -12 UNF	200	250	90 oz	ACK40

Installation Instructions

Installation of AquaChek filters requires a filter mounting base (see above chart for proper base + filter), and tools to cut and thread the airline at the location the filter mounting base is being installed. It is recommended that a self-venting water trap be installed between the air compressor and the AquaChek mounting base and filter. This will prolong the life of the AquaChek filter. **Important**: **The AquaChek mounting base must be installed a minimum of 10 feet away from the compressor**. This allows the air to cool enough to achieve maximum moisture removal. It is vital that the inlet and outlet sides of the mounting base be installed with the proper configuration. It is recommended a flow control valve be installed just before the filter to prevent possible polymer migration. **Change Out Circuit**: In situations where taking the compressor off line for filter changes is undesirable, the installation of an isolation circuit around the filter system is recommended. The isolation circuit requires 2 two-way valves installed to allow routing of air around the filter system during filter change-outs. **Note**: Apply thread sealing tape to all male thread surfaces when installing the AquaChek base and filter. See our AquaChek website for more complete information and installation instructions at: **www.aquachekfilters.com.**

Setting a New Standard for Compressed Air Moisture Control

AquaChek Kits

Kit #	Kit Contents	CFM Rating	PSI Rating	Water Capacity
ACKG15	Single filter mounting base w/ 1/2" NPT inlet + outlet and differential pressure gauge 2 – ½"x ¼" Reducer bushings 1 - AquaChek AC10 spin-on filter 1 – ½" Flow control valve 1 – ½" Nipple Small roll of thread sealing tape Instruction sheet	15	175	10oz
ACKG25	Single filter mounting Base w/ 1" NPT inlet + outlet and differential pressure gauge 2 – 1"x 3/4" Reducer bushings 1 – AquaChek AC20 spin-on filter 1 – 1" Flow control valve 1 – 1" Nipple Small roll of thread sealing tape Instruction sheet	50	175	20oz
ACKG35	Single filter mounting Base w/ 1 ½" NPT inlet + outlet and differential pressure gauge 1 – AquaChek AC30 spin-on filter 1 – 1 1/2" Flow control valve 1 – 1 ½" Nipple Small roll of thread sealing tape Instruction sheet	100	250	45oz
ACKG45	Dual Filter Mounting Base w/ 2" NPT inlet + outlet and differential pressure gauge 2 - AquaChek AC30 spin-on filters 1 – 2" Flow control valve 1 – 2" Nipple Small roll of thread sealing tape Instruction sheet	200	250	90 oz

Replacement Gauge #

ACG1 1 – Differential pressure gauge specifically designed for use on ACKG15, 25, 35, 45 kit bases only. The ACG1 gauge **cannot** be used on the mounting bases in our ACK10, 20, 30 or 40 kits.

The ACKG1is an easy to read differential pressure gauge that will indicate exactly when it is time to change the AquaChek air-drying filter. This assures optimum system protection and performance.

AMSOIL Filter Change Recommendations

Lube Filters

Vehicles with Gasoline or Diesel Fueled Engines

- **EaO and Donaldson Endurance ELF 7349**(Dodge Cummins 5.9L): Up to 25,000 miles (15,000 miles for severe service) or one-year service life, whichever comes first, when used in conjunction with AMSOIL Synthetic oil. Always change oil filter at the time of oil change.
- **Donaldson Endurance:** Heavy-duty commercial vehicles and off road equipment, when used in conjunction with AMSOIL Synthetic oil, up to two times longer than OEM* recommendations, not to exceed 60,000 miles for onhighway diesel applications. Always change oil filter at the time of oil change.
- **EaBP By-Pass Filters**: When used in conjunction with AMSOIL motor oil and EaO or Donaldson Endurance filter, the EaBP should be changed every other full flow filter change up to 60,000 miles. When used with other brands of motor oil or full flow filters, the EaBP filter should be changed every other full flow change. AMSOIL recommends using oil analysis when extending oil drain intervals.
- **WIX and Donaldson "P" Series:** OEM* Recommendations

Stationary Engines

- **EaO and Donaldson Endurance:** Up to two times longer than OEM* recommendations. Always change oil filter at time of oil change.
- **WIX and Donaldson "P" Series:** OEM* recommendations

Air Filters

Vehicles with Gasoline or Diesel Fueled Engines

- **EaA:** Change every 4 years or 100,000 miles whichever comes first, provided the filter is cleaned according to AMSOIL recommended procedures every year or 25,000 miles, whichever comes first. Not applicable for off-road, frequently dusty, or other severe duty applications. Clean and change more often as determined by operating conditions or as indicted by restriction gauge.
- **WIX and Donaldson P:** OEM* recommendations or restriction gauge.

Heavy-Duty Commercial Vehicles and Off Road Equipment

- **Donaldson Endurance:** Change per restriction gauge. Donaldson guarantees Endurance Air Filters will last twice as long as standard filters; otherwise, Donaldson will provide a new filter at no charge. See Donaldson Endurance air filter program rules below.
- **WIX and Donaldson P:** OEM* recommendations or restriction gauge.

Stationary Engines

- **EaA:** Change every 4 years, provided the filter is cleaned according to AMSOIL recommended procedures every year. Not applicable for off-road, frequently dusty, or other severe duty applications. Clean and change more often as determined by operating conditions or as indicted by restriction gauge.
- **Donaldson Endurance:** Change per restriction gauge. Donaldson guarantees Endurance Air Filters will last twice as long as standard filters; otherwise, Donaldson will provide a new filter at no charge. See Donaldson Endurance air filter program rules below.
- **WIX and Donaldson P:** OEM* recommendations or restriction gauge.

Donaldson PowerCore Applications

- Per OEM* recommendations or restriction gauge

 *Original Equipment Manufacturer

Donaldson Endurance Air Filter Rules

- Use only Donaldson Endurance Air Filters.
- Have accurate records of current cellulose media change intervals.
- Keep accurate track of miles driven with Donaldson Endurance air filters.
- Maintain accurate maintenance records.
- Provide filter for inspection.
- Standard Donaldson warranty terms and conditions apply

EaA Cleaning Instructions:

- Every year or 25,000 miles whichever comes first
- Carefully remove filter from the housing. Clean the housing with a shop towel being careful not to knock contaminants into the air inlet.
- Cleaning can be done by two methods:
    - Vacuum Cleaning: Place the filter on a flat surface and carefully vacuum the filter media on the dirty side where the incoming airflow enters the filter. Be careful not to rub the filter pleats with the vacuum cleaner attachment too aggressively as this may damage the filter. Using a vacuum with too much suction may damage the filter.
    - Shop Air Cleaning: Hold the filter with one hand and carefully blow the filter media at a 45-degree angle on the clean side of the filter using low-pressure (15 to 20 psi) shop air. Be careful not to rub the filter pleats with the air nozzle as this may damage the filter. Using too high of air pressure will damage the filter media.
- Reinstall the filter into the air filter housing and secure.
